DETAILED ACTION

Allowable Subject Matter

1. Claims 15-17 are allowed.
2. The following is an examiner's statement of reasons for allowance: U.S. Pat. No. 6,132,397 (Davis et al.) disclose a method for using an occlusion catheter comprising the steps of creating an opening at an insertion point of the ascending aorta (col. 5, lines 6-8), inserting the occlusion catheter for the ascending aorta through the opening (col. 5, lines 9-12), placing the balloon in a proper indwelling position and inflating the balloon to occlude the ascending aorta (col. 5, lines 19-28), and releasing a cardiac muscle protective drug from a drug release aperture located at the leading end (fig. 2) of the catheter to deliver the cardiac muscle protective drug in the vicinity (fig. 1) of a coronary ostium (col. 5, lines 30-34) but lacks an incision being made in the chest and a dilator being used to open the incision and fixing the occlusion catheter to the ascending aorta. Roth teaches a method of using an occlusion catheter in the heart comprising the steps of making an incision in the chest of the patient (col. 13, lines 26-31) and expanding the opening with a dilator (90) but lacks fixing the occlusion catheter to the ascending aorta. Therefore there is no motivation to combine Davis et al. and Roth to arrive at Applicants' claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
